

Platform Engineer (80%-100%)

Who we are

NOUMENA Digital AG is a rapidly growing innovative Swiss-based Technology Company.

We build enterprise products and solutions across a variety of industries with our own smart contract language on our cutting-edge technology. Our success is built on process-oriented distributed technology, a focused vision and strategy, an international team of business and technology experts, a cross-industry customer base and a strong external partner network.

Culture

We value engineers that are excited about developing innovative software. Our engineers are comfortable in the fast-changing world of start-ups. They are creative, like to figure things out together and are eager to move things forward.

Role

You'll join our platform team in developing a backbone for the future.

In this role you will:

- help develop and design a domain specific smart contracting language that serves as the core for applications spanning various industries.
- build a distributed platform that allows for the execution of automated contracts and workflow.
- design APIs for use inside and outside of the organization.
- work with product teams to deliver a high quality end product.

Qualifications

You:

- are an experienced Java or Kotlin developer, or have extensive experience in a similar language. Ideally you know your way around Spring Boot or related technologies.
- have a solid understanding of software testing, continuous integration, and deployment.
- are naturally curious about new technologies, and like to learn new things. You keep up to speed with developments in the world of software engineering.
- work well in a team, and communicate well. You like to teach and mentor others.
- speak English fluently, and can clearly express your thoughts.

We Offer

- A competitive compensation package
- Work in an agile team with highly experienced Software Engineers, DevOps, Business Analysts and Product Managers
- Exposure to multiple industries (finance, energy, automotive industry, ...)

Other Requirements

A Swiss or EU/EFTA passport or a valid Swiss work permit type B or C
