

Senior Back-End Engineer (80%-100%)

Who we are

NOUMENA Digital AG is a rapidly growing innovative Swiss-based Technology Company.

We build enterprise products and solutions across a variety of industries with our own smart contract language on our cutting-edge technology. Our success is built on process-oriented distributed technology, a focused vision and strategy, an international team of business and technology experts, a cross-industry customer base and a strong external partner network.

Culture

We value engineers that are excited about developing innovative software. Our engineers are comfortable in the fast-changing world of start-ups. They are creative, like to figure things out together and are eager to move things forward.

Role

You'll join one of the product teams in developing solutions for our customers as well as contributing to the overall infrastructure, tools, and supporting software we are building for all our customers.

In this role you will:

- help develop and design Kotlin-based software based on our growing platform and tailored to our customer's needs.
- work on containerised event-driven micro services.
- design APIs for the integration of our customer's client systems.
- contribute to our shared toolbox of software (libraries, tooling, etc.) that makes us more efficient and scalable.

Qualifications

You:

- are a developer with at least two years of software product development experience, ideally in Java or Kotlin.
- have a solid understanding of software testing, continuous integration, and deployment.
- are naturally curious about new technologies, and like to learn new things. You keep up to speed with developments in the world of software engineering.
- work well in a team, and communicate well.
- speak English fluently, and can clearly express your thoughts.
- speaking German is an added asset although not necessary.

We Offer

- A competitive compensation package
- Work in an agile team with highly experienced Software Engineers, DevOps, Business Analysts and Product Managers
- Exposure to multiple industries (finance, energy, automotive industry, ...)

Other Requirements

A Swiss or EU/EFTA passport or a valid Swiss work permit type B or C
